

AMC THREAD GREASE™

Lubricants & Cutting Oils

IMDEX™

Description

THREAD GREASE is a heavy-duty thread compound. It has a wide working temperature range, a low water wash value and aids in preventing corrosion. THREAD GREASE is designed to reduce galling and friction and protects the threads from damage, wear and seizing.

Application

THREAD GREASE is designed to be suitable for use in both wire line and air drilling applications. It should be applied generously to the tool joints and threaded sections of drill pipe and is normally applied with a brush, spatula or other suitable item. THREAD GREASE is extremely tenacious, adhering to all metal surfaces.

Recommended Treatment

Apply generously to the tool joints and threaded sections of drill pipe.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.

Advantages

- Easily applied
- Excellent lubricating properties
- Resistant to water wash
- Resistant to high temperatures
- Exceptional adhesion characteristics
- Good anti-wear properties
- Good anti-seize and sealing properties
- Helps prevent corrosion

Typical Physical Properties

Appearance: Tacky paste

Solubility in water: Immiscible
