

AMC TUBE LUBE™

Lubricants & Cutting Oils

IMDEX™

Description

TUBE LUBE™ is a vegetable oil-based soap that has been developed to enable the core sample to enter and slide more easily into the inner tube promoting longer runs through fractured broken formations. TUBE LUBE™ will protect and improve the life of the inner tube, is water soluble and will not stain the core.

Application

TUBE LUBE™ is applied liberally to the inner tube surface before it is lowered and released into the core barrel.

Recommended Treatment

TUBE LUBE™ can be placed generously on the inside of the inner tube or smeared lightly over the entire surface area and lifter.

Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.

Advantages

- Facilitates longer coring runs in broken formations
- Good adhesion and lubricating properties
- Minimises wear of the inner tube and core lifter
- Will not stain the core

Typical Physical Properties

Appearance:	Thick amber to yellow paste
Specific gravity:	1.0 – 1.01
