

# DeviGyro RG400

**IMDEX**<sup>TM</sup>

**Large, adaptable centraliser kit  
for specialty infrastructure  
applications**

# DeviGyro RG400

## Description

The RG400 Centraliser Kit is compatible with DeviGyro RG40 and provides large scale auto-rotate centralisers designed for various civil and geotechnical drilling applications.

The system is especially suited to larger diameter, near-vertical drill holes such as piling and raise boring drilling applications.

## Application

Complimenting the DeviGyro RG40 Standard's adjustable centraliser system, the RG400 Centraliser Kit boasts heavy duty rollers and patent-pending rotating functionality, securing both smooth, high-speed descent and high precision.

DeviGyro RG400 is adjustable between the range of 100 and 400mm/4" to 15".

## Integration

From the drill rig to the office, DeviGyro data integrates with IMDEXHUB-IQ™ to securely optimise data transition and management whilst minimising manual entry error.

Devico's DeviAligner provides the DeviGyro with the most accurate starting direction and enables directional surveying at any angle.

## Advantages

- Increase survey accuracy in large diameter drillholes
- Robust and reliable
- Two wheel sizes for adaptability
- Auto-rotate functionality
- Adjustable, user-friendly
- Intuitive operating software
- True wireless - connects when fully assembled
- Immediate, comprehensive QA check
- Commercially available battery
- Not affected by magnetics

## Applications

- Specialty infrastructure applications
- Open hole surveying
- In-rod surveying
- Pilot holes
- Piling

## Specifications (centralisers only)

Weight	5.7kg/12.56lbs per unit
Height	530mm/20.86in per unit
Wheel sizes	45mm/1.77in & 125mm/4.92in
Centraliser range	100mm/3.93in to 400mm/15.78in
Material	Non-magnetic
